

Starting Line: Assessment Workout

Assessing your starting point and tracking progress in a variety of areas (aside from scale metrics) can help best determine goals and a plan for achieving results.

- This workout includes a series of exercises that you'll reassess at the end of the program to see how far you've come.
- Utilize your participant packet to keep track of how many reps of each exercise you could complete, how long you could hold your plank, and how quickly you ran 1 mile today.
